

MEDITE TRICOYA MDF:

The Solution for Specialist Joinery Manufacturing Company

The scenario: Crawfords Joinery Ltd is a specialist joinery manufacturing company based in Berwick upon Tweed. They supply a range of timber doors, windows & conservatories, to trade customers as well as the general public. Crawfords Joinery already use Accoya® wood on certain projects but following a recommendation from a Medite Tricoya distributor the joinery company chose Medite Tricoya for this job.

The solution: 12mm 1220x2440 panels were supplied for the door faces. They were machined to give a v-grooved effect and then coated with Sikksens Old Pine Opaque paint system.

The result: Crawfords Joinery Ltd found that Medite Tricoya machined perfectly well and they would definitely use Medite Tricoya again. "We are considering using Medite Tricoya on our next project so I have made an order for additional sheets to my local supplier". I will use Medite Tricoya when a job requires specialist panels for the benefits such as durability and stability.
